OPERATION TRANSFORMATION

'TIS THE SEASON! FROM TOTAL REDESIGNS TO TINY ACCESSORIES, THERE'S LOTS YOU CAN DO TO REFRESH YOUR KITCHEN THIS SPRING.

1 White kitchens are enjoying a comeback. Felix Milns, founder of HUX-London, says, "White kitchens are a timeless choice, providing an opportunity to be accessorised with statement pieces such as pendant lighting, natural stone or more detailed flooring. By painting walls in neutral colours, more intricate details such as joinery can become the focal point of the room. Through the combination of white hues, different textures can be employed throughout the kitchen to create a considered space that is not only fresh and contemporary but layered and comfortable. With any design approach, a white kitchen will offer endurance through its versatility and design potential!" hux-london.co.uk 2 This eye-catching new island model extraction centre boasts an on-trend matt black painted steel finish and is inspired by professional kitchens. It also has a smart dialogue system that communicates with the Falmec hob below for seamless performance. Europa extraction centre by Falmec, falmec.com, available to order from Showtime Essential Kitchen Products, Dublin, showtimekitchens.ie
