HUX Wins 'Most Innovative Bespoke Cabinetry Company 2025 – Southern England' at BUILD Design & Build Awards

We're excited to share that HUX has been awarded Most Innovative Bespoke Cabinetry Company 2025 – Southern England by the BUILD Design & Build Awards.

This recognition celebrates the creativity, craftsmanship, and commitment that drive everything we do at HUX. From forward-thinking design to precision manufacturing, our goal has always been to push the boundaries of what bespoke cabinetry can be—both aesthetically and functionally.

Organised by BUILD Magazine, a leading digital publication for the global construction and property industry, the Design & Build Awards spotlight the most exceptional contributors across architecture, construction, and interior design. Winners are selected through a meticulous research and evaluation process, highlighting those who have made significant strides in innovation and service.

We are honoured to be acknowledged amongst such impressive talent in the industry. This award reflects the hard work of our entire team—from our concept designers and technical experts to our workshop craftsmen and installation specialists—who bring passion and precision to every project.

Thank you to our clients and collaborators for trusting us with your homes and spaces. We look forward to continuing to innovate, inspire, and deliver joinery of the highest standard.
